

Xenon LDS 1900 Interchangeable

LDS 1900 Interchangeable Scanner

InData Systems is pleased to introduce a new lower cost, but more robust, scanning solution for decoding fluorescing bar code marks. Meet your security scanning needs with this new affordable scanner with interchangeable optic. With the patented optic mounted into the scanner, the new custom design performs at the same high quality as our interchangeable models. An all in one solution, the self contained scanner provides all of the benefits and features of our interchangeable optic at a more affordable price. If your requirements are for many locations, and you need quantities, this is your ideal solution.

The optical part of the scanner is customized into one of InData Systems' patented wavelength configurations to read 'invisible' marks with any of the covert marking technologies. Covert marks can only be read under special situations, but the bulkiness and non-portability has restricted their widespread usage until now.

Various wavelengths are available to suit your scanning requirements. For more information on different wavelengths, call or email InData Systems.

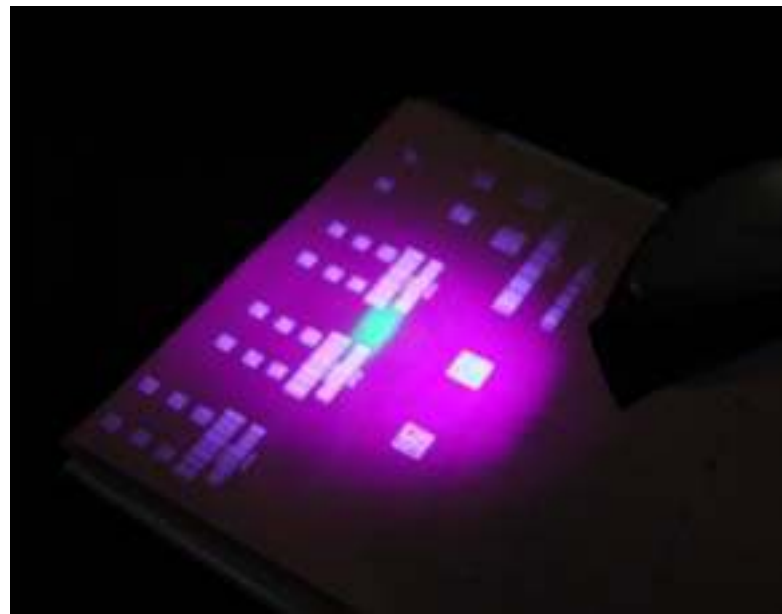

Also available in a cordless model, the LDS 1902 is your solution for wireless connectivity.

Features and Benefits

- Illuminates UV and visible fluorescing Inks
- Quick decoding of multiple code types
- Fixed or hand held usage
- Affordable solution for many scanning needs
- Rugged design for all types of applications

Applications

- Security Marked items
- Consumer product sub-assemblies
- Brand and integrity protection
- Protection from product diversion
- Track and trace any product

Technical Specifications

Specifications

Mechanical: Dimensions LxWxH: 104mm (4.1") x 71mm (2.8") x 160mm (6.3")

Working Range: 1 inch to 5 inches

Rotational Sensitivity: 360°

Illumination Wavelength: 375 nm – UV, IR 465nm - Blue Postal, (others on special request)

Symbologies: Reads standard 1D, PDF, 2D, Postal and OCR Symbologies
Decode capabilities dependent on kit configuration

Host System Interfaces: USB, Keyboard Wedge, RS-232 and IBM 46XX retail terminals

Warranty 1 year warranty
